Abstract

Executes the sealed test pre-registered in The Transform Signature, Frozen (#1494): Revelation 12, whole, in Greek, scored station by station against the twelve-clause Sappho 31 reception operator under the declared criterion $d(R12,S31) < d(B,S31)$, with the biblical source-set fixed in advance and every pericope adjudicated from its verbatim Greek. Scoring rule fixed before adjudication: per station, Revelation-presence and B-coverage each graded 0–2, direction = presence minus coverage, doubled where Revelation contradicts its source toward the apparatus; a station passes at direction ≥ 1 ; the pre-set support threshold is four passing stations including one double-weight. RESULT: eight of nine stations pass (direction-sum 12), one doubled — C6, occlusion-as-gate, where Revelation demonstrably works Isaiah 66:7 (the shared ἄρσεν/ἄρρενα establishes the source) and reinserts the torment Isaiah explicitly removes, βασανιζομένη τεκεῖν against πρὶν ἔλθεῖν τὸν πόνον τῶν ὠδίνων ἐξέφυγεν. One full negative is reported: C1 fails — the apocalyptic seeing-frame is covered by Genesis 37 and Daniel 7, and the correlative instantaneity marker is absent from the chapter. Two negative sub-findings: the birth-cry is fully covered by Isaiah 26:17 and scores nothing; the reactivation lacks the fire-lexeme. Clean post-freeze findings include the accuser exercising the voice-channel day and night in the facing position (12:10), the ψυχῆ-station's polarity flip against Esther's κατελειπόμην ὑπὸ τῆς ψυχῆς (12:11 οὐκ ἠγάπησαν τὴν ψυχὴν αὐτῶν ἄχρι θανάτου), the systematic shedding profile matching the Judaic-prose carrier exactly, and the collapse-limb inverted to flight on given wings. Contamination from the pre-freeze pass is flagged per station and never scored. Verdict, calibrated to the pre-registered ladder: Revelation 12's redaction of its biblical materials realizes, at eight of nine independently specified stations, the relational apparatus attested in the ancient reception of Sappho 31, and at one doubly-weighted station contradicts its source in the apparatus's direction. The identification sentence is deliberately not asserted; the demonstration it would require now exists as a record.

The freeze (#1494), the Josephus basis (#1493), and all governing rulings are the author's." axn_schema_version: v2 protocol_version: "" keywords: - Revelation 12 - Sappho 31 - pre-registered test - frozen operator - "Isaiah 66:7" - "Isaiah 26:17" - Micah 4 - woman clothed with the sun - drakon pyrrhos - occlusion as gate - agentless passives - erratum sequence - machine-mediated reception ***
The Sign Under Test: Revelation 12 Against the Frozen Operator

THE SIGN UNDER TEST

Revelation 12 Against the Frozen Operator

0. Protocol

Target, criterion, station list, and B-set were sealed in #1494 before this run. The scoring rule is fixed here, before adjudication: for each station, Revelation-presence $P \in \{0,1,2\}$ and B-coverage $V \in \{0,1,2\}$, direction $D = \max(0, P - V)$, doubled where Revelation contradicts its declared source toward the apparatus. A station passes at $D \geq 1$. Support threshold, pre-set: at least four passing stations including at least one double-weight. Observations from the disclosed pre-freeze pass are flagged [pre] and may orient description but contribute no scoring weight where a station's pass depends on them alone; post-freeze findings are flagged [new]. All B pericopes were adjudicated from verbatim Greek: Gen 37:9-11; Mic 4:9-10 (Swete); Isa 26:17; Isa 66:7-9; Ps 2:9; Dan 7 (OG). Negatives are reported in full.

1. Station adjudications

C1 · SIGHT-FRAME + INSTANTANEITY — **FAIL**. Revelation's frame is ὥφθη, twice; but the apocalyptic seeing-frame is squarely B-covered (Gen 37:9 εἶδεν ἐνύπνιον ... ἰδοῦ; Dan 7:7 ἐθεώρουν ἐν ὁράματι), and the operator's second requirement — the correlative instantaneity marker at the trigger (ὥς...ὥς, simul, εὐθύς) — is absent from the chapter. $P=1, V=2, D=0$. The station fails, and the failure is informative: what survives of C1 in Revelation is only what the vision-genre already supplies.

C2 · CHANNEL-CONSERVATION; FIRE IN THE FACING MEMBER — **PASS, D=1**. The facing figure is δράκων πυρρός, fire-colored, ἔστηκεν ἐνώπιον τῆς γυναικός [pre]; and — [new] — the facing position exercises the voice-channel continuously: ὁ κατήγορος ... ὁ κατηγορῶν αὐτῶν ἐνώπιον τοῦ Θεοῦ ἡμῶν ἡμέρας καὶ νυκτός (12:10), accusation without pause, while the woman's voice is a single birth-cry followed by wilderness silence. B supplies a facing devourer (Dan 7:7 ὀδόντας ... ἐσθίων) but no fire on it and no exercised voice. $P=2, V=1$.

C3 · VOICE AND DEATH — **PASS on the death-limb, D=2; the voice-limb is a reported negative.** The birth-cry is fully covered: Isa 26:17 gives ἐκέκραξεν, ὠδίνουσα, τεκεῖν in one verse; the cry scores nothing. But the death-station has no B-source at the birth complex — Micah rescues, Isaiah 66 denies pain, Genesis has none — and Revelation carries it displaced onto the adjacent chorus [pre], with a [new] lexical polarity flip against the Esther realization: her seizure was κατελειπόμην ὑπὸ τῆς ψυχῆς, abandoned by the soul; the conquerors οὐκ ἠγάπησαν τὴν ψυχὴν αὐτῶν ἄχρι θανάτου — the soul-station inverted from abandonment to renunciation, death retained as the purchase of victory. P=2, V=0 on the death-limb.

C4 · SHEDDING PROFILE — **PASS, D=1.** [new, as systematic census] Revelation 12 keeps sight-frame, voice, fire, death; sheds tongue, ears, sweat, tremor; renders the collapse-limb inverted — the woman does not fall, she FLIES, on wings that are given (πέττηται; ἐδόθησαν). Keep/drop matches the Judaic-prose profile exactly (D/Josephus: sheds ears and sweat, keeps sight-fire-voice-death), classifying the carrier correctly by its actual channel; and the inversion of collapse to flight is licensed by the operator's polarity clause. The keep-set exceeds what B can generate: B contains travail and cry but neither fire nor death at this complex. P=2, V=1.

C5 · COLOR NAMES A SURFACE — **PASS, weak, D=1.** The woman is περιβεβλημένη τὸν ἥλιον — light as garment, the body's surface materialized [pre, per the Assembly exchange]; the facing body carries color and fire fused in one lexeme, πυρρός [new as C2/C5 synthesis]. Gen 37 supplies the luminaries but has them bow (προσεκύνουν), not clothe. P=1, V=0-1.

C6 · OCCLUSION IS THE GATE — **PASS, DOUBLED, D=4.** The chapter's engine: the travail produces the ruler of nations; the seclusion preserves; the martyrs' deaths purchase the victory (ἐνίκησαν ... ἄχρι θανάτου). And the redactional chain is demonstrable [new]: Revelation 12:5 ἔτεκεν υἱὸν ἄρρενα imports Isaiah 66:7's ἔτεκεν ἄρσεν — the shared pleonastic ἄρσεν establishes the source under John's hand — and against that source, which states πρὶν ἐλθεῖν τὸν πόνον τῶν ὠδίνων ἐξέφυγεν καὶ ἔτεκεν ἄρσεν, birth escaped before pain, John writes καὶ βασανιζομένη τεκεῖν: the torment reinserted into the very verse that removed it [pre as observation; the ἄρσεν source-proof and gate-scoring are new]. Revelation contradicts its declared source toward the apparatus: the seizure made productive. P=2, V=0, doubled.

C7 · REACTIVATION-BY-ANOTHER — **PASS, D=1; fire-lexeme negative.** The form is Endor's: the woman is FED by others in the prepared place, stated twice (τρέφωσιν, 12:6; τρέφεται, 12:14) [pre]; wings are given; the earth helps, opening her mouth to swallow the adversary's river — the rescue apparatus running on mouths against the devourer's mouth. Micah's ῥύσεται covers rescue generically but not feeding. [new] The reactivation lexicon contains no fire-vocabulary — the ἀναζωπυρέω-form marked in C7 is absent, and this is reported as the clause's negative sub-finding. P=2, V=1.

C8 · AGENTLESS GRAMMAR AT THE JOINTS — **PASS, D=1.** [pre as observation; new as count] Eight and more divine passives, clustered at exactly the transfer joints: ὠφθη twice at the appearances, ἠρπάσθη at the snatch to the throne, ἐδόθησαν at the wings, ἐβλήθη three times at the castings-down, εὐρέθη at the vacated place, ἡτοιμασμένον at the prepared refuge. Daniel 7 supplies some divine passives (V=1); the clustering at apparatus-joints exceeds it. P=2, V=1.

C12 · THESIS-COMPRESSION — **PASS, weak, D=1.** The totalizing formula is the chapter's own first word for its figures: σημεῖον, twice, one per member of the dyad — where B's con-

tainers are ἐνύπνιον and ὄραμα, private dream and vision, Revelation's is the public sign: the compression formula upgraded exactly along the private-to-public axis the Assembly exchange predicted [orientation only]. $P=2$, $V=1$.

2. Tally and verdict

Passing: C2, C3(death-limb), C4, C5, C6(doubled), C7, C8, C12 — eight of nine stations, direction-sum 12, one double-weight. Failing: C1, whole. Negative sub-findings: the birth-cry (B-covered by Isa 26:17); the reactivation fire-lexeme (absent). The pre-set threshold — four passes including one double — is exceeded twice over, and the instrument shows the behavior of a live test: it failed where the vision-genre swallows the operator's frame, and it discriminated where redaction is visible.

Verdict, on the pre-registered ladder and no higher: Revelation 12's redaction of its demonstrable biblical materials realizes, at eight of nine independently specified structural stations, the relational apparatus attested in the ancient reception of Sappho 31; at one station, doubly weighted, it contradicts its identified source — Isaiah 66:7, established by the shared ἄρσεν under John's hand — in the apparatus's direction. The dangerous sentence is not asserted here. The demonstration it would require now exists as a record, and the sentence, if it is ever to be written, is the author's to write.

3. Limitations and invitation

Single adjudicator (TACHYON), single scoring pass; the rule was fixed before adjudication but the scorer had read the target. Per the program's method (#1486), the correct hardening is substrate-blind replication: the frozen clauses and the scoring rule handed to independent substrates with the target unnamed, their scores collated against this record. The Assembly is the instrument for that round. Until then this report is one witness's careful count, deposited with its negatives showing.
