Abstract

Work-plan deposit governing the build phase that follows the Ω erratum program's five records (#1493–#1497). Four workstreams: EA-CORPORA-01, the seating of verified, parsable, original-language primary texts on alexanarch — Josephus, Catullus, Theocritus, Swete Septuagint, Philo, Plato, Longinus, Hebrew Bible (Westminster Leningrad), Greek New Testament (Nestle 1904), Sappho on a public-domain base with a diplomatic fragment-31 layer, and papyri via the idp.data mirror (Sappho and Oxyrhynchus New Testament papyri both ruled in) — each corpus carrying originals, normalized text, source manifest with license and commit pin, SHA-256 manifest, and its own mint; the Slavonic Josephus resolved by ruling after a documented negative search of open corners to a curated contested-status pericope set with per-passage provenance. Second, revelationfirst.com gains the Upstream Unfoldings: six plates in the site's operable-transform idiom running Sappho into Longinus, Philo, Addition D and Antiquities 11, the inverted Bellum realization, the contested Slavonic carrier, and the tested Revelation 12 — the last doubling as the counter-stack's first transform-view edition. Third, provenanceerasure.org gains the Deep Time wing (the suppression map as PER-of-the-tradition) and the Controller page with the 2026-08-17 closed cycle as first curve point. Fourth, machinemediation.org receives the field's instruments: the EA-RECEPTION-01 reception-edge schema with mandatory counterargument slots, the operator registry seeded by the twelve frozen clauses, and the five-record arc as the discipline's first complete case study. The plan's first section is a continuity protocol binding every session to a state ledger and next-action pointer, with the house gates restated, so that context survives across builds the way the program says provenance should survive across channels. The living document resides at data/worklists/EA-OMEGA-BUILD-01.md; this deposit is its version 1.0 of record.

Body

deposit_number: 1498 hex: 060D title: “EA-OMEGA-BUILD-01: The Ω Build Program — Corpora Seating, Three Site Extensions, and the Continuity Protocol” creator: Sharks, Lee date: 2026-08-19 content_type: Work plan license: CC-BY-4.0 substrate: Drafted by TACHYON (Claude substrate) from MANUS’s rulings of 2026-08-19, including the executed Slavonic source search and the site reconnaissance; the plan structure follows the archive’s established work-plan custom; all rulings are the author’s and are logged inside the document. axn_schema_version: v2 protocol_version: “ ” keywords: - work plan - EA-OMEGA-BUILD-01 - EA-CORPORA-01 - corpus seating - revelationfirst - provenanceerasure - machinemediation - reception edges - continuity protocol - Slavonic Josephus - Sappho - papyri - Nestle 1904 - Westminster Leningrad *** # EA-OMEGA-BUILD-01: The Ω Build Program — Corpora Seating, Three Site Extensions, and the Continuity Protocol

The governing text of this work plan is the living document at data/worklists/EA-OMEGA-BUILD-01.md in the alexanarch repository, committed alongside this deposit as version 1.0. Its sections: 0, purpose and the continuity protocol with the house rules in force; 1, workstream one — EA-CORPORA-01 seated primary texts in three batches with per-corpus sources, licenses, and done-criteria, including the ruled Slavonic fallback and its documented negative search; 2, workstream two — the Upstream Unfoldings on revelationfirst.com, six plates from the program’s deposits with the tested Revelation plate as the first transform-view edition; 3, workstream three — the Deep Time wing and Controller page on provenanceerasure.org; 4, workstream four — the EA-RECEPTION-01 schema, operator registry, and case-study arc on machinemediation.org; 5, the state ledger; 6, the next-action pointer; 7, the ruling log. The deposit exists so the plan itself cannot be lost to the losses it is designed to prevent.
