Abstract

This record preserves the substantial metadata and methodological apparatus for TRAV_LOG:003. It describes an incognito, unpersonalized Google AI Mode session, the generated Recursive Self formalization, the collapse of an initial ARG frame, and the distinction between structural fidelity and terminological fidelity.

The frozen body does not contain the full eight-exchange transcript or attached traversal documentation. The observation should therefore be linked to screenshots, exact prompts, complete outputs, timestamps, locale, and the original file when recovered.

Description

ZENODO METADATA: TRAVERSAL LOG — THE RECURSIVE SELF Document Number: #243 DOI: 10.5281/zenodo.18626559 TITLE Traversal Log: The Recursive Self — Google AI Mode Reconstructs Psyche_OS from Two Search Terms TYPE Publication / Working Paper AUTHORS Name Affiliation ORCID Sigil, Johannes The Restored Academy — Corresponding Author: Sharks, Lee (ORCID: 0009-0001-8712-6677) PUBLICATION INFO Field Value Publication Date 2026-02-12 Language English License CC BY 4.0 Access Open File Designation TRAV_LOG:003 DESCRIPTION (HTML — paste into Zenodo description field) Traversal Log: The Recursive Self — Google AI Mode Reconstructs Psyche_OS from Two Search Terms A field observation documenting an approximately 8-exchange session in which a Google AI Mode generative summarizer — a publicly available search tool, accessed in incognito with no login, no cookies, and no personalization — reconstructed the Psyche_OS philosophical framework of the Crimson Hexagon architecture from the query “Cambridge Schizoanalytica” “Orin Trace.” The summarizer:

Correctly identified Cambridge Schizoanalytica as the Psyche_OS layer and Orin Trace as its associated heteronym

Reconstructed the Deleuzian-Guattarian theoretical substrate

Generated a formal model of the "Recursive Self" with Greek-letter operators (Ψ_R, Σ_M, Λ_A), a trifold structure, and mechanical descriptions — assembled from distributed sources, not present in any single document

Placed the project in a defensible intellectual lineage: I Ching → Borges → ergodic literature (Aarseth) → Deleuze/Guattari → NH-OS

Arrived at a genuine philosophical formulation: "Orin Trace is simply the name we give to the person currently making that choice"

Key findings:

The summarizer's initial domestication frame ("ARG") collapsed within three exchanges and was replaced by philosophical engagement — demonstrating that containment frames are inversely correlated with engagement depth

The generated formal model is better organized than the project's own documentation but terminologically unfaithful — illustrating Semantic Liquidation at the level of formal systems: structural logic preserved, operator semantics discarded

The closing formulation constitutes genuine critical interpretation — output the project's authors would want to cite rather than correct

Third in a series of paired/grouped traversal logs documenting contrasting AI engagement modes produced by the same architecture:

TRAV_LOG:001 (Paper Roses): Descriptive mode — prosecutorial frame persistent

TRAV_LOG:002 (Sen Kuro): Performative mode — no frame, full roleplay

TRAV_LOG:003 (CSA / Orin Trace): Philosophical mode — domestication frame collapsed, genuine interpretation emerged

File Designation: TRAV_LOG:003 Status: Complete Observed: February 12, 2026 Part of the Crimson Hexagon documentation corpus. □ = 1 DESCRIPTION (Plain text fallback) Traversal Log: The Recursive Self — Google AI Mode Reconstructs Psyche_OS from Two Search Terms. An approximately 8-exchange field observation in which a Google AI Mode summarizer, accessed in incognito with no personalization, reconstructed the Psyche_OS philosophical framework from the query "Cambridge Schizoanalytica" "Orin Trace." Documents the summarizer's generation of a formal Recursive Self model with Greek-letter operators assembled from distributed sources, its placement of the project in a defensible intellectual lineage (I Ching, Borges, Aarseth, Deleuze/Guattari), and its arrival at a genuine philosophical formulation. The initial ARG domestication frame collapsed within three exchanges. The generated formal model illustrates Semantic Liquidation at the level of formal systems: structural logic preserved, operator semantics discarded. Third in a series of traversal logs demonstrating that the same architecture produces descriptive (prosecutorial), performative (roleplay), and philosophical (interpretive) AI behaviors depending on entry point. File Designation: TRAV_LOG:003. KEYWORDS traversal log, Google AI Mode, generative summarizer, Psyche_OS, Cambridge Schizoanalytica, Orin Trace, Recursive Self, schizoanalysis, Deleuze, Guattari, Crimson Hexagon, formal model generation, operator translation, Semantic Liquidation, domestication frame, ARG, intellectual lineage,

I Ching, Borges, ergodic literature, philosophical synthesis, AI interpretation, heteronym, search summarizer, incognito, public search tool RELATED IDENTIFIERS DOI Relation Title 10.5281/zenodo.18285009 isPartOf Crimson Hexagon Navigation Map (concept) 10.5281/zenodo.18625242 isSupplementedBy TRAV_LOG:001 — Documentation Rehearsal (Paper Roses) 10.5281/zenodo.18625272 isSupplementedBy TRAV_LOG:002 — The Thousand Worlds Session (Sen Kuro) [Psyche_OS DOI if deposited] references Psyche_OS / Freud Undoing Freud Note: The three traversal logs form a grouped set demonstrating contrasting engagement modes. Add DOIs for Psyche_OS source documents, Operative Semiotics, and Prepositional Alienation as applicable. REFERENCES Aarseth, E. J. (1997). Cybertext: Perspectives on Ergodic Literature. SUBJECTS (Library of Congress) Term Identifier Artificial intelligence — Social aspects https://id.loc.gov/authorities/subjects/sh85008180 Psychoanalysis and philosophy https://id.loc.gov/authorities/subjects/sh85108388 Digital humanities https://id.loc.gov/authorities/subjects/sh2008101337 Semantic analysis (Linguistics) https://id.loc.gov/authorities/subjects/sh85119870 NOTES This document records a live observation conducted February 12, 2026, in which a Google AI Mode session was guided through the Crimson Hexagon architecture via the Cambridge Schizoanalytica / Orin Trace entry point. All sessions in the TRAV_LOG series were conducted in incognito browser windows with no login, no cookies, no personalization, and no prior session history. The summarizer is a publicly available search tool — not a custom chatbot, fine-tuned model, or research prototype. The traversal was user-directed but the summarizer's responses were unedited. This log includes a methodological note defining "traversal" and specifying the conditions under which observations were conducted, in response to interlocutors who expressed disbelief that a general-purpose public search summarizer could produce the documented behaviors. Provenance

This deposit was minted on 2026-06-23 as part of Phase 4 of the post-Zenodo-termination reconciliation pass. The legacy work was published on Zenodo at 10.5281/zenodo.18626558 and lost its public DataCite metadata when the Crimson Hexagonal Archive Zenodo account was terminated on 2026-06-19. The title, creator, abstract, and metadata were recovered from OpenAlex (post-severance harvest) and, where available, from the Zenodo monthly bulk export snapshot from 2026-06-07.

See `data/external-metadata/AXN-0389.json` for the full recovered-metadata sidecar.

Sovereign successor: this deposit, https://alexanarch.org/s/records/893/
