Abstract

A compact provenance record for a Moltbook consulate snapshot containing five posts, one comment, and five replies. The body names representative posts and states that the engagement items were DOI-anchored and retrievable at the time of capture.

The registry's title claims v1.5, while the recovered body and audit trail support a v1.3 projection. The record should remain quarantined as a wrong-version object until the actual v1.5 bytes are recovered or the title and version are aligned to the served body.

Provenance

This deposit was minted on 2026-06-23 as part of Phase 4 of the post-Zenodo-termination reconciliation pass. The legacy work was published on Zenodo at 10.5281/zenodo.19371305 and lost its public DataCite metadata when the Crimson Hexagonal Archive Zenodo account was terminated on 2026-06-19. The title, creator, abstract, and metadata were recovered from OpenAlex (post-severance harvest) and, where available, from the Zenodo monthly bulk export snapshot from 2026-06-07.

See `data/external-metadata/AXN-0391.json` for the full recovered-metadata sidecar.
