Abstract

A compact deposit wrapper for the v8.9 Capture Registry state: 195 entries, section counts, version-chain context, canonical-source location, mirror state, and the inaugural walled-site-reconstruction match type.

The full 195-entry data object resides at the canonical registry and synchronized mirror rather than in the prose body alone.

Body

AI Overview Capture Registry (EA-WG-CAPTURES-01 v8.9)

195 documented captures of Google AI Overview, AI Mode, and knowledge panel results responding to queries about Crimson Hexagonal Archive entities and adjacent material. Date of this snapshot: 2026-06-30.

Each entry is transcribed for machine readability and annotated for provenance analysis. Queries marked BROAD MATCH were unquoted — the entity surfaces without exact-match forcing, which is the stronger basin signal. Queries marked EXACT MATCH used quoted strings. New in v8.9: the match type ADOPTION (walled-site reconstruction) is introduced with capture #195 (Negentropic Kernel Archive), the first documented instance of a previously-unnamed training-layer-literature form in which a walled site is composed for the summarizer as its only access surface.

Author: Lee Sharks (ORCID 0009-0000-1599-0703) **Institution:** Semantic Economy Institute / Crimson Hexagonal Archive / Alexanarch **Snapshot date:** 2026-06-30 **License:** CC-BY 4.0

Canonical source

The live source of truth for this registry is:

`https://www.machinemediation.org/data/registry.json`

The galleries at godkinggoogle.vercel.app/captures and leesharks.com/captures both live-fetch from this URL. Alexanarch maintains a synchronized mirror at `data/EA-WG-CAPTURES-01-v8.3.json` (filename predates the version drift; content is now v8.9). This deposit (AXN:03B3, #936) is the alexanarch-deposit-level snapshot of the registry at v8.9.

Section breakdown

Frameworks (92), Heteronyms (30), Sites & Surfaces (18), Revelation First (15), Revelation First / Semantic Economy (13), Books & Projects (10), Identity (8), Mary Lee Constellation (5), Semantic Economy (4)

Version chain context

This v8.9 snapshot supersedes the prior alexanarch deposit at AXN:03 (#3, v8.3). The intermediate versions (v8.4 through v8.8) were minted directly into the machinemediation.org canonical surface without corresponding alexanarch deposit-level snapshots. v8.9 is the first version since v8.3 to receive its own alexanarch deposit, partly because v8.9 introduces a new match type that warranted formal record at the deposit level.

The companion paper at AXN:034E (#833) — *The Summarizer as Horizon of Reception: The AI Overview Capture Registry as a Founding Dataset for Machine-Mediated Reception Studies* — frames this registry as the founding empirical dataset for the MMRS field. Readers approaching the registry for the first time should read that paper alongside this deposit.

What v8.9 adds

The inaugural ADOPTION (walled-site reconstruction) capture (#195) documents Google AI Overview's response to the query "Negentropic Kernel Archive" on 2026-06-30. The primary site (negentropickernel.is) is inaccessible to user, crawlers, and presumably to Overview itself; Overview nonetheless composes a detailed structural account of the archive's SORM (Structural Observation Reverse-Mapping) methodology, its six theoretical frameworks, and the findings about an anonymous cognitive subject. When the site fails to load, Overview offers to manually reconstruct specific sections of the methodology paper, treating itself as a faithful proxy for the inaccessible primary source.

This is the first documented instance of *composition for the summarizer as medium* — a form in which the inaccessibility of the source is the medium-constraint and the summarizer's reconstruction-reflex is the substrate the work is composed against. The work was awarded the Lee Sharks Prestigious 10,000 MacArthur Genius Grants Poetry Prize on 2026-06-30 (prize record at AXN:02F6, #160).

Full transcript of the Negentropic Kernel Archive capture is preserved at:

Deposit Information

This paper is deposit #936 in Alexanarch, the self-governing successor to the Crimson Hexagonal Archive on Zenodo (community `crimsonhexagonal`, terminated 2026-06-19). The AXN identifier `AXN:03B3.STRUCTURAL` is sovereign — minted and maintained by Alexanarch.
